ONE S55 AD

iKitbot ONE S55 AD Advertising exposure in high-foot-traffic areas such as shopping malls inherently carries high commercial value. Leveraging the robot's autonomous mobility, mobile advertising can effectively boost both reach frequency and coverage. Based on this market insight and our technical expertise in mobile devices, we have launched this new robot that integrates cleaning and advertising functions. While performing floor cleaning tasks, it also serves as an advertising display, offering dual functionality in one unit to achieve "1+1 > 2" operational efficiency.

Product Features

Cleaning + Advertising, Dual Function in One

Plays advertising content while performing daily cleaning tasks, maximizing equipment utilization with multi-functional design.

27-inch HD Large Screen for Long-Distance Visibility

Equipped with a leading-size advertising screen among cleaning robots, ensuring clear visibility even from 5 meters away to enhance visual impact.

Dual-Side Display for Comprehensive Promotion

Features a high-definition advertising screen on the front and a space for promotional posters on the back, expanding information display space.

Quickly Detachable Screen for Flexible Use

The advertising screen supports fast assembly and disassembly, enabling the robot to adapt seamlessly to various scenarios.

Convertible to Fixed Booth for Easy Scene Switching

When detached, the screen can be paired with a stand as a fixed advertising spot, meeting diverse scenario needs.

Compatible with Video & Images with Adaptive Formatting

Plays mixed video and image content with automatic format adaptation, catering to diverse promotional needs.

Product Specifications

Screen Size	402mm × 78.7mm × 657.2mm
Stand Size	407mm × 426mm × 126.5mm
Screen Weight	9 kg
Viewable Area	598mm × 336.5mm
Resolution	1920 × 1080 (Full HD)
Aspect Ratio	16:9
Color Display	10-Bit, 16.7 Million Colors
Usage	onnect to robot for operation.
Control Method	Remote Control
